

# DRY BULK

Outperforms  
in **ALL**  
categories.

## BEST PAYLOADS

Lightest tare weights for the best payloads in the industry. Weight savings mean increased payloads per haul for our customers. In excess of 400 KGS (882 lbs) lighter than our previous generation and even more over typical dry bulk trailers.

## BETTER FUEL ECONOMY

A lower centre of gravity and improved trailer component distribution resulting in better fuel economy that also drastically reduces the probability of rollovers and total losses.

## FASTEST UNLOAD TIMES

Advance has the fastest unload times in the industry and our user friendly set-up helps for better turnaround times. This means more loads and more bottom line for your company!
